

Field Engineer

Location: Rijswijk (NL)

Full/Part-time: Full-time

Your job

As a Field Engineer, you are responsible for independently building, configuring and testing cabinets and systems in the (offshore) field of edge computing and CCTV. You will work closely together with our electrical engineers, software developers and data analysts to find the optimal solution for our clients and to maintain our internal testing facilities.

Your main tasks will be:

- Performing site visits to customers onshore and offshore to assess project feasibility
- Installation and commissioning systems and projects offshore
- Building and maintaining our internal testing facilities, including executing testing procedures
- Professionally provide (remote) support to clients/end-users
- Critically checking technical drawings and documents
- Supporting colleagues in the sales, engineering and project management departments to develop and deliver the best option for our customers
- Proactively supporting our software development teams

Your profile

Helin consists of people with backgrounds in aerospace engineering, energy industry, renewables and the academic world. This makes us curious to understand exactly how things work and how they can be improved. We love to propose better alternatives in a constructive way. This requires empathy about existing bottlenecks, curiosity about domain knowledge, analytical problem solving skills and expertise in data analytics and software development.

We highly value an inquisitive mindset and eagerness to learn. To feel successful within our fast-growing scale-up environment you will need to be comfortable asking questions in order to acquire more in depth knowledge.

The following suits you:

- Experience as an electrician, mechanic or panel builder
- Working independently and with a critical mindset using our test equipment
- You enjoy travelling to our clients worldwide and offshore
- Professional English speaking
- Experience with CCTV is a plus
- Experience with ATEX / IECEx regulations is a plus. BOSIET certification is a plus.

Our offer

Helin offers a dynamic and challenging full-time job within an innovative company operating in global industries. We offer you a competitive salary, professional development opportunities, travel allowance, pension allowance, training courses and working in a global sector with traveling opportunities. As a family company we always strive for a permanent partnership and long term relations.

About Helin

Helin contributes to improving the efficiency and safety of remote operations. Moreover, we help putting industrial companies in charge of their analytics by developing innovative edge analytics solutions. We love solving complex technical puzzles and have empathy for all the stakeholders involved.

Helin has a strong focus on 24/7 and/or remote operations within rapidly innovating industries such as the (renewable) energy sector. Examples of our clients are solar and offshore wind & marine companies. We combine domain knowledge, clever programming and thoughtful deployment throughout the whole process.

Interested?

Do you recognize yourself in this job description and do you get excited about its challenges? Then, you are the Senior Backend Software Developer we are looking for! Please respond directly, either in English or in Dutch.
